

Policy on industry admittance of electrolytic manganese

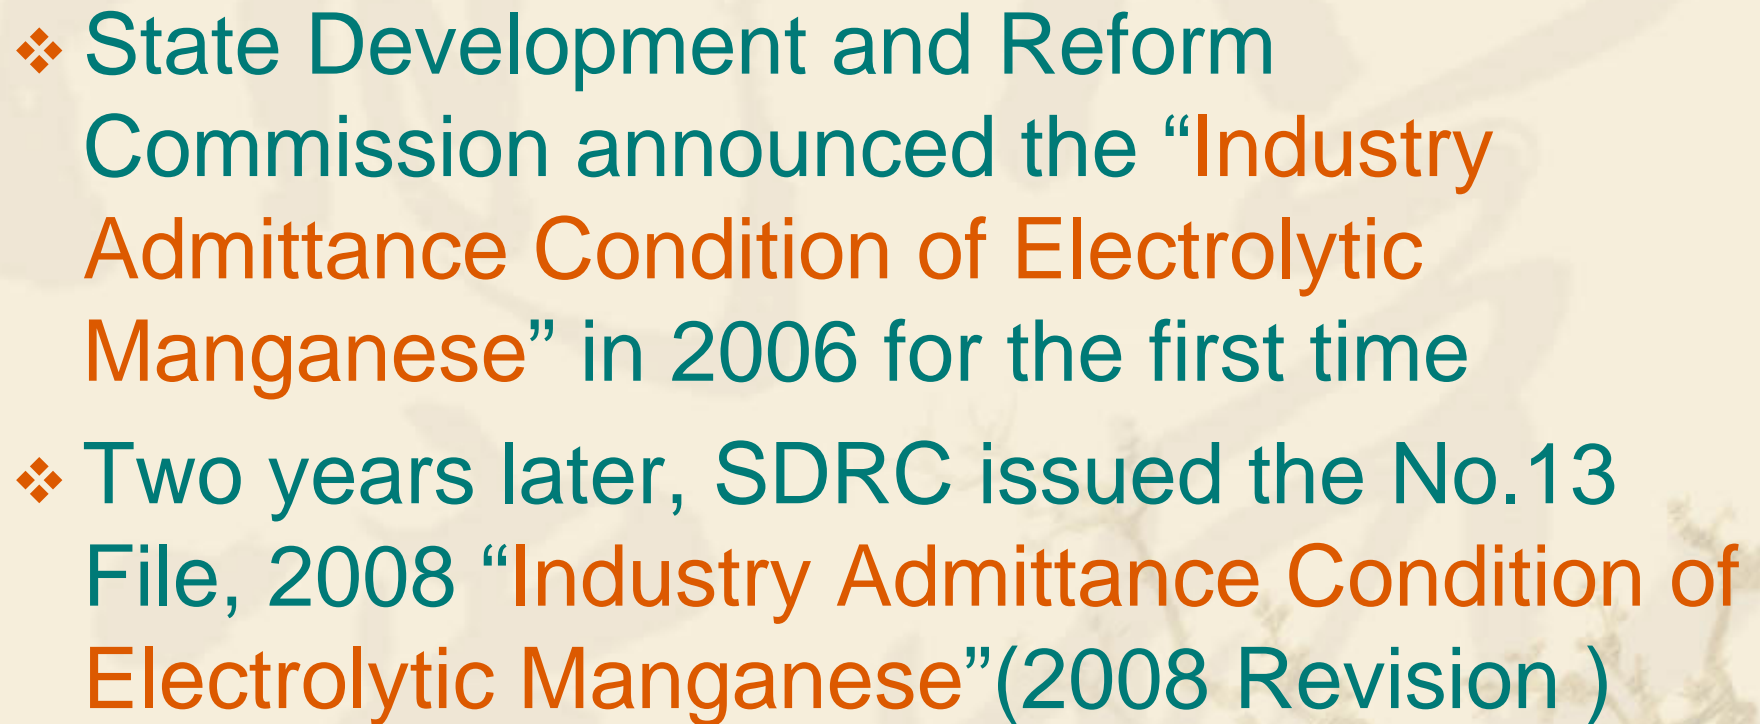

2009/3/28

全国锰业技术委员会

Recently years, the electrolytic manganese industry has been developing very fast in China. The current capacity has been to 2 million tons and the output exceeded the 1 million tons as well, to be the absolute No.1 in world.

- 
- 
- ❖ State Development and Reform Commission announced the “Industry Admittance Condition of Electrolytic Manganese” in 2006 for the first time
 - ❖ Two years later, SDRC issued the No.13 File, 2008 “Industry Admittance Condition of Electrolytic Manganese”(2008 Revision)

Admittance conditions

- ❖ 1. Techniques and equipments
- ❖ 2. Environmental Protection
- ❖ 3. Energy consumption
- ❖ 4. Resource consumption
- ❖ 5. Environmental protection, safety and production facility

Two aspects in Implementing Admittance

- ❖ 1、 Identifying Objectives and Directions
- ❖ 2、 Promoting upgrade through admittance
 - ❖ (1) Improving the existing technology
 - ❖ (2) Accelerating enterprise restructuring
 - ❖ (3) Achieving sustainable development through admittance
