

## **45<sup>th</sup> Annual Conference Technical Tour**

Thursday, June 13, 2019

*For conference delegates only*

### **OFZ Plant**

OFZ, a.s. is a diversified manufacturer of ferroalloys, cored wires and silicon metal with over a 60-year history. Today, the company manufactures and offers its customers a wide range of manganese and silicon ferroalloys, cored wires with different powder fillers, different grades of silicon metal and by-products from the furnace dust and slag. OFZ is among the most important suppliers of ferroalloys for steelmakers & foundries in the Central Europe where roughly 90% of the production is sold. OFZ focuses on diversification strategy of manufacturing high value-added products and pursues waste-free management processes & technologies.

Since 2018, OFZ, a.s. has introduced Integrated Management System including Quality Management System pursuant to ISO 9001 (the first certification is dated back to 1994) and Environmental Management System pursuant to ISO 14001. Since 1996, OFZ has been an affiliate member and since 2004 a regular member of the European Association of Ferroalloys Producers - Euroalliages headquartered in Brussels. The company is a member of International Manganese Institute IMnI seated in Paris since 2000 and an affiliate member of CaSi Institute seated in Brussels since 2013.

OFZ, a.s. is also a member of National technology platform for research, development and innovation for raw materials (NTP VVIS).
