2026 国际合金矿产业大会

International Alloy Minerals Industry Conference 2026

2026年6月3日-5日 | 中国·天津

邀请函

INVITATION LETTER

The International Manganese Institute
Shanghai Ganglian E-commerce Holdings

International Alloy Minerals Industry Conference Invitation 2026

Dear_____Sir/Madam：

The 2026 International Alloy Minerals Industry Conference co-hosted by the International Manganese Institute and Shanghai Ganglian E-commerce Holdings co.,ltd (Mysteel), supported by the Tianjin Port (Group) Co.Ltd will be convened at the Crowne Plaza Tianjin Binhai Hotel by 3rd of June to 5th of June. In the meantime, the Fourth Tianjin International Shipping industry Expo hosted by Tianjin city will be convened at the National Convention and Exhibition Center (Tianjin). We sincerely invite you to attend this conference and take part in the related events! Join us for this grand occasion!

Tianjin port situated at the western side of the Bohai Bay, as the maritime gateway and international hub port for the Beijing-Tianjin-Hebei region and Northern China. Tianjin Port leverages its unique advantage as a 'convergence point of maritime and inland routes' to continuously strengthen strategic links between domestic and international economy, propelling the 'port economy' to new heights. In 2025, imports of manganese and chrome ores through the Port of Tianjin reached new

record highs, exceeding 22 million tonnes and 18 million tonnes respectively. Having ranked first nationally for many consecutive years, with a market share consistently maintained at around 80%, the port has further consolidated its core position as China's premier gateway for alloy ore imports. Leveraging the deep integration of smart and green port initiatives, Tianjin Port has established a more efficient and low-carbon modern logistics system. Its maritime-rail joint transport network now comprehensively covers key inland regions including North China, Northwest China, Northeast China and Inner Mongolia. Transport times to destinations such as Inner Mongolia and Ningxia are consistently maintained within two days, whilst inland distribution efficiency and service quality have both been enhanced, making the port the preferred partner for global mining companies entering the Chinese market.

In 2026, the alloy mining industry is at a critical juncture in its transition from scale expansion to a focus on quality and efficiency. It must actively break free from 'overcapacity', reconstruct a new equilibrium between market supply and demand, and accelerate the optimisation of product structures to adapt to profound changes in consumer demand. Looking ahead, three major industry trends are becoming increasingly prominent: firstly, resource companies are accelerating their global expansion, relying on overseas resource and production capacity partnerships to continuously enhance their international competitiveness; secondly, leading mining firms are accelerating their overseas expansion, driving the entire

industrial chain—including exploration, mining, processing and trade—to go global in a coordinated effort, thereby building a more resilient global supply chain system; thirdly, green products continue to be in high demand, with green technologies and products such as low-carbon metallurgy and recycling becoming the market's new favourites, leading the way towards sustainable development in the sector.

Capitalising on the exhibition platform of the Tianjin International Shipping Industry Expo and leveraging the International Manganese Institute's global influence and resources in the alloy ore sector, Mysteel will host the "International Alloy Ore Industry Conference" and the "4th Tianjin International Shipping Industry Expo" from 2 to 5 June 2026. The event will invite enterprises from major alloy ore-producing nations such as South Africa, Australia, Gabon, India and Brazil, alongside over 500 domestic companies. This combination of exhibition and conference will facilitate communication between overseas and domestic sectors, contributing to the high-quality development of the shipping and alloy ore industries. We look forward to welcoming leaders and experts from domestic and international ferroalloy industry associations, senior executives from leading enterprises across the ferroalloy supply chain, renowned economists, industry researchers and numerous corporate representatives to this grand gathering!

Shanghai Ganglian E-commerce Holdings co.,ltd (Mysteel)
18/3/2026

Introduction of the conference

Key agendas of the conference：

1.The opportunities and challenges of upgrading the Ferroalloy industry

2.The developments of the 2026 Steel industry and potential breakthroughs

3.The developments and outlook of the ores and resource supply chain

4.The 2026 Macroeconomic outlook

5.The ferroalloy development discussions through the low carbon green energy

6.Plans for the Expansion of Ferroalloy Production in China in 2026 and the Comparative Advantages of Production Regions

7.The Development of the Supply and Demand Dynamics for Overseas Alloy Ores

8.Global Demand and Development of the Ferroalloy Market

The time： 3/6/2026 - 5/6/2026

Conference Venue： Crowne Plaza Tianjin Binhai Hotel

The hosts：

The International Manganese Institute

Shanghai Ganglian E-commerce Holdings

The Supporter：

Tianjin Port (Group) Co.Ltd

Highlights of the conference:

1.50000㎡, With five major exhibition zones and over 500 exhibitors, the event sets the benchmark for the global shipping industry.

2. From raw materials to end-users, linking mining operations with alloy production and extending into downstream steel mills to bridge the entire supply chain.

3. A gathering of steel mills, face-to-face exchanges, and the joint creation of a platform for supply and demand interaction

4. The development and optimisation of the value chain act as a catalyst for the industry

5. From domestic to overseas,based in China and connecting with the global markets, encouraging the participation of overseas clients in domestic conferences

6. Decoding new policies and analysing emerging trends,the conference focuses on assess the industry's current state and future prospects

7.Prioritising high quality and identifying new opportunities: Fostering end-to-end supply chain collaboration to ensure reliable delivery for the entire industry

8.Connecting resources and forging new collaborations, the conference will specifically invite leading enterprises including ferroalloy producers, downstream end-users, trading companies, power utility firms, and energy-intensive downstream consumers to create a comprehensive networking platform.

The conference schedule（drafted）

3/6/2026 (Wednesday) Registration、exhibitor set up and Concurrent forums	
9:00-19:00	Conference Registration
14:00-17:00	Concurrent Forums 1：Alloy Ore Futures and Spot Market Exchange Forum
14:00-17:00	Concurrent Forums 2：Face-to-Face Supply and Demand Conference
14:00-17:00	Concurrent Forums 3：Business presentations
4/6/2026（Thursday）International Alloy Mining Industry Conference - Morning Session	
9:00-9:30	Opening Ceremony Address by the Governmental Officials Address by Tianjin Port Authority Address by Tianjin Port Officials Address by the host Address by the leaders of Mysteel
09:30-10:10	Topic 1：The Global and China's Macroeconomic interpretations Speaker：Renowned Macroeconomist
10:10-10:40	Topic 2：A Review and Outlook of the Chinese Steel Market Speaker：China Iron&Steel Association Deputy Head of the Market Research Department Mr. Wu Yong
10:40-11:00	Topic 3：Tianjin Port Business Promotion Speaker：Tianjin Port (Group) Co.Ltd
	Topic：Mysteel Manganese ore index Speaker：To be confirmed
11:00-11:30	Topic 4：Global Manganese Ore Market Analysis and Outlook Speaker: International Manganese Institute
11:30-12:00	Topic 5：Global Chrome Ore Market Analysis and Outlook Speaker: International Chromium Development Association

12:00—14:00 Lunch & Lunch Break	
4/6/2026(Thursday)International Alloy Mining Industry Conference - Afternoon Session	
14:00-14:30	Topic 1:2026 China's manganese market demand and supply dynamics and trend analysis Speaker: Chief Ferroalloy Analyst of Mysteel, Mr. Zha Zuodong
14:30-15:00	Topic 2: Sustainable Development of the Mineral Resources Supply Chain Speaker: Major Trader
15:00-15:30	Topic 3: Key Market Trends, Challenges and Opportunities for Manganese Alloys Worldwide Speaker: Major International Miner
15:30-16:00	Topic 4: The Development and Potential of High, Medium and Low Grade Titanium Ore Consumption Speaker: Renowned Titanium Representative
16:00-16:30	Topic 5: Outlook for the Steel Market in the Second Half of 2026 Speaker：Head of Market Information from Mysteel, Mr. Xu Xiangchun
4/6/20(Thursday)26 18:00—20:00 Banquet	
5/6/2026(Friday) Fourth Tianjin International Shipping industry Expo	

Registration form

Introduction to the EXPO

Shipment is a vital foundation for economic and social development, as well as a key bridge and link for international trade. According to data from the International Maritime Organisation, the shipping industry accounts for over 80% of global trade. During his inspection of Tianjin Port, General Secretary Xi Jinping emphasised that for the economy to develop and the nation to grow prosperous, the transport sector—particularly maritime transport—must first be strengthened. We must aim high and strive to build world-class smart and green ports, better serving the coordinated development of the Beijing-Tianjin-Hebei region and the joint construction of the Belt and Road Initiative, whilst establishing an important strategic pivot hub in the north for connecting the domestic and international dual economic circulation.

To thoroughly implement the directives of General Secretary Xi Jinping, Tianjin has successfully hosted three consecutive editions of the International Shipping Industry Expo. The 2025 International Shipping Expo attracted nearly 500 leading enterprises, listed companies and world-renowned ports from 22 countries and regions, drawing over 60,000 professional visitors to the venue for networking and business discussions, yielding fruitful results.

The 4th Tianjin International Shipping industry Expo will be held from 2 to 5 June 2026 at Phase I of the Tianjin National Convention and Exhibition Centre. Targeting new trends and opportunities in the global shipping industry, the event will place greater emphasis on the extension of the shipping industry chain and supply chain. It will focus on key elements such as international port operators and shipowners, port, shipping and offshore engineering equipment, international freight forwarding and logistics supply chains, green and smart shipping, and port and shipping service trade, comprehensively showcasing cutting-edge developments and major achievements in the global shipping sector. Concurrent events will include investment promotion, business matching, collective signing ceremonies and commercialisation initiatives. The expo will also organise specialised forums on international maritime exchanges, maritime arbitration, freight forwarding and logistics, shipping finance, cold chain processing, cruise and yacht services, and tugboat and pilotage services. The aim is to create a premier industry event and exchange platform characterised by a comprehensive industrial chain, high level of specialisation, broad coverage, significant influence and authoritative information.

The 4th Tianjin International Shipping industry Expo

3/6/2026-5/6/2026 National Convention and Exhibition Center (Tianjin)
